“Children show us every day that they know **how to use ICT**. However, they might not always use ICT responsibly and safely. Being a good ‘digital citizen’ is vital in the 21st century. Children need to understand copyright, the true costs of downloading “free” music and movies and the far-reaching consequences of what they do and say while using the Internet. They need guidance from teachers and from their parents to be sure that they are always thinking about their own safety, and the safety of others.”

Literacy in ICT is for me!
